

Parsa Nik Youtab Company

COMPANY INTRODUCTION

Parsa Nik Youtab Company was established and registered in March 2014. In accordance with the strategic policy of Behnad Bana Development Company to establish and employ an executive company (contractor) under its subsidiary to manage and execute construction projects as well as provide building operation investment and maintenance management services, this company was established in July 2018 by transferring shares to Behnad Bana Company to realize this policy. Currently, the company's activities are focused on two areas: construction projects and building operation and maintenance management, a brief summary of the company's projects and activities is provided below. In order to carry out the assigned missions, this company has taken steps to pursue and obtain an executive license and also obtain a first rank contractor from the National Management and Planning Organization (in the final stages of issuing the certificate).

PERSPECTIVE

Parsa Nik Youtab Company sees itself as a pioneer, learning, growing and collaborating, becoming a well-known reference company since 2018, achieving a premium place in building industry of Iran.

The company intends to reach to a premium place in building industry with creativity and innovation, teamwork and best use of facilities and workforce, focusing on advantageous contracting, investing and collaboration opportunities, while enhancing the existing qualities.

Furthermore, establishing appropriate prerequisites of industrial building and nationalization of modern construction technologies, needed for high quality seismic resistant building, construction cost reduction, completing the projects as soon as possible, enhancing the work environment safety, and entering the technical and engineering market of region, is another key perspective of **Parsa Nik Youtab company**.

To reach the premium places in building industry, the company aims to increase its capacity in providing engineering services, contracting and construction. to five times its current capacity.

MISSION

1. Increasing the corporation's shares in national markets through delivering high-quality services.
2. Creating value by satisfying the company's key costumers, stakeholders and beneficiaries.
3. Benefitting from the capable, devoted and technically well-educated employees.
4. Using efficient administrative methods to decrease the time and expences, and increase quality and productivity.
5. Employing new technologies in construction industry.
6. Moving in the direction of persistent construction.
